Product Bulletin

AMX graphics to replace Ockular graphics

For more than five years Kentec have supplied the Ockular graphics software to supplement its addressable fire alarm control panel range. The Ockular graphics software was produced for Kentec under licence by a third-party, but from the 28th Sept 2024 we are no longer able to supply this product. Kentec will continue to provide limited first line support for existing Ockular installations, while also providing a new graphics solution with the AMX Fire Graphics System.

We are pleased to announce the launch of our new AMX Fire Graphics System for Taktis EN & UL addressable control panels. AMX is a powerful and sophisticated software solution providing building managers complete monitoring and control over their fire detection system through a comprehensive fire risk and incident management system. AMX for Taktis supports both EN and UL.

AMX software is packed with features:

- Windows based software package
- Provides either text or full graphics status reporting
- Up to 2000 configurable user profiles
- Multi-PC support using TCP-IP groups
- Remote control of fire alarm system i.e. reset, silence, evacuate, disablements etc.
- Configurable event instruction messages for event response
- Multiple history logs for events, controls, isolations, users, and system events
- Easy site map navigation
- Visibility of device analogue levels on request

AMX is provided in 4 different package sizes based on the number of Taktis panels being monitored by the Graphics system, reducing the cost for smaller systems.

AMX packages are based on the total number of nodes on the Taktis network, it is important to remember nodes can be a mix of panels and repeaters.

Although every effort has been made to ensure the accuracy of the information contained in this document it is not warranted or represented by Kentec Electronics Ltd. to be a complete and up-to-date description.

Product part numbers

Part no.	Description
AMT11000001	**AMX Fire Graphics System - Single Node Package** Graphical fire alarm management system licensed to monitor a single Taktis panel
AMT21000001	**AMX Fire Graphics System – 2 to 4 Node Package** Graphical fire alarm management system licensed to monitor a Taktis network of between 2 to 4 nodes.
AMT31000001	**AMX Fire Graphics System - 5 to 24 Node Package** Graphical fire alarm management system licensed to monitor a Taktis network of between to 5 to 24 nodes.
AMT41000001	**AMX Fire Graphics System – 25 to 127 Node Package** Graphical fire alarm management system licensed to monitor a Taktis network of between to 25 to 127 nodes.

Please note an AMX version to support Syncro and Elite RS fire alarm control panels is in progress and will be released as soon as possible. Further information will be provided as soon as available.

For further information and pricing on the AMX Fire Graphics System please contact our Sales Team.
